EDUCATION

Stern School of Business, New York University

BS, Business, Technology, and Entrepreneurship (BTE)

May 2030

GPA: N/A

Coursework: Linear Algebra; Commerce and Culture; Texts and Ideas; Entrepreneurship: Mind and Action; BTE Immersion

Skyline High School

GPA: 3.8/4.0, SAT 1590/1600

June 2026

Honors & Extracurriculars: American Invitational Math Exam (AIME) Qualifier, USA Computing Olympiad Silver Division, DECA State Champion, IB Diploma Recipient, AP Scholar with Distinction, Competitive Coding Club founder, The Forum Co-Editor-in-Chief,

EXPERIENCE

Wharton Leadership in the Business World Program

Student

Philadelphia, Pennsylvania

July – August 2025

- Conducted **internal, external, and competitive analysis** presentations for Uber
- Created and presented corporate recommendations for Uber collaboration with Lucid and Waymo

So Positive

Marketing and Strategy Intern

Remote

June - August 2025

- Acted as a strategy intern for a startup building confidence for Gen Z, connecting organizations to Gen Z speakers to organizations for events
- Cold-emailed event organizers
- Presented pitch deck and closed collaborations with event companies, matching speakers with the event for them at a cost

SoftCom Lab @ Cal Poly Pomona University

Machine Learning Research Intern

Remote

May 2023 – Nov 2024

- Created app to track water intake that connects to sensor and microcontroller: worked with a Time of Flight sensor and Boron Microcontroller, achieved **90% accuracy**
- Built an interpretable, real-world application by bridging health, engineering, and user relevance
- Published Haowen Yu, Siroush M., *A Health Monitoring and Water Consumption Tracking System based on Smart Cup using Artificial Intelligence and Internet of Things*, (**US Patent Application No. 63/719,681**)

PROJECTS

Independent NeuroTech Research

March 2026

- Created and trained reading network to further increase feasibility of hypothesis
- Researched the possibility of a stimulus-aware tDCS brain stimulation system integrated with the TRIBE V2 cognitive prediction model to potentially better reading ability of dyslexic individuals
- Wrote [paper](#) documenting findings at the end of independent research program

Personal Website

July 2026 - Current

- Modelled using Blender and incorporated 3D model using GSAP ScrollTrigger
- Used HTML, CSS, JavaScript, and Python to create various visual effects
- Animated simple animations using Blender for website transitions

SKILLS/INTERESTS

Technical: Frontend(HTML, CSS, JS), Technical writing, Programming (Java, C++, Flutter)

Tools: Figma, Wireframing, User Research, Blender

Languages: English, Mandarin Chinese, Spanish

Interests: Painting, Writing, Hiking
